TRADITIONAL MATH 100 – Exam 3 – Fall 2021

Directions: You will find 15 problems listed below. No notes/books/friends are allowed. Graphing calculator models above the level of a TI-84 plus are not allowed. You have one hour to complete this exam.

Page 1 20 pts.	Page 2 20 pts.	Page 3 20 pts.	Page 4 20 pts.	Page 5 20 pts	TOTAL 100 pts

1. (7 points) Find $f^{-1}(x)$ when $f(x) = 3x - 7$.

2. (7 points) Given $g(x) = x^2 + 4x$ and $h(x) = 2x + 5$, find $g(h(x))$.

3. (6 points) Expand completely using properties of logarithms (you may assume all variables to be positive): $\log\left(1000x^4\sqrt{y}\right)$

4. (8 points) Solve the following rational equation: $\dfrac{1}{2x-1} = \dfrac{4}{x}$

5. (6 points) Solve and check: $x - 2 = \sqrt{3x+4}$
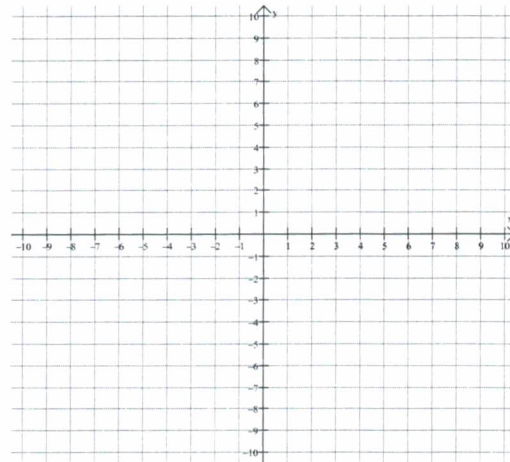

6. (6 points) Simplify i^{525}.

7. (6 points) Condense into a single logarithmic expression using the properties of logarithms (you may assume that x is positive): $\log(x) - \dfrac{1}{5}$

8. (8 points) Given that $x = 1$ is a zero of $p(x) = x^3 - 7x + 6$, find all the other zeros, real or complex, of $p(x)$.

9. (6 points) Graph the function $f(x) = \sqrt{x}$ on the graph below, include at least 4 points on this graph. Then, using your graph, solve the inquality $f(x) = \sqrt{x} < 2$.
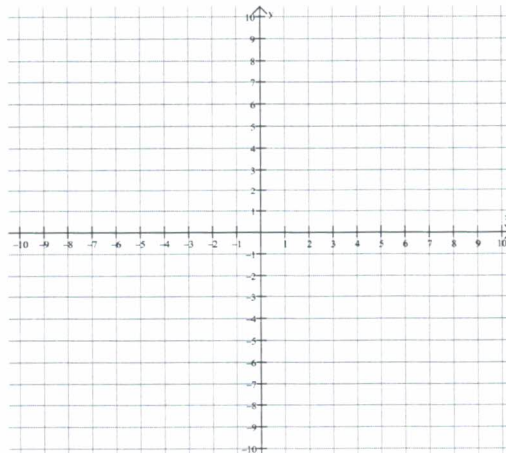

10. (8 points) Graph the exponential function $f(x) = 2^x$. Then, graph the function $g(x) = \log_2(x)$ on the same grid. Include at least 5 points on each graph, and, include relevant asymptotes.

11. (6 points) Find a 3rd degree polynomial with zeros at $x = -4$, $x = 1$ and $x = 0$, that also passes through the point $(4, 9)$.

12. (6 points) Solve the rational inequality $\dfrac{x - 4}{x} \le 0$, remembering to check endpoints.

13. (6 points) Simplify and write in standard $a + bi$ form: $(10 - 5i)(1 + 2i)$

14. (6 points) Find the domain of the function $f(x) = 17 + \log(x + 7)$.

15. (8 points) Graph the rational function $r(x) = \dfrac{x^2 - 9}{x - 3}$.
